*Stay up-to-date, learn about new developments,
meet leaders in health innovation, and get to know your colleagues.*

8:00 am-9:00 am, Children's National Auditorium, 2nd Floor Main

Wednesday, September 16, 2015

The Diane and Norman Bernstein Professorship in Community Pediatrics

Improving Community Health: Going Upstream

Presented by **Mark Weissman, MD**

*Vice President, Goldberg Center for Community Pediatric Health
Division Chief, General Pediatrics and Community Health, Children's National*

Learning Objectives:

Attendees of this session will be able to:

1. Describe the impact of "social determinants of health" on community health outcomes.
2. Define the terms "toxic stress" and "adverse childhood experiences" and their contribution to social determinants of health.
3. Detail "upstream" initiatives of the Goldberg Center for Community Pediatric Health and community partners to improve community health outcomes.

Session Overview:

Increasing evidence suggests that the cumulative effect of "adverse childhood events" (ACE's) and ongoing "toxic stress" can have permanent impact not just on a child's mental health- but on overall lifetime health and well-being for individuals and communities. To transform community health outcomes, broader community partnerships are needed to identify and pro-actively address these social determinants of health.

We will describe early efforts of Children's National, the Goldberg Center for Community Pediatric Health and other community partners to collaboratively go "upstream" to improve health outcomes for our children and our community.
